

Operating Instructions - Part No. 05516

1. Pass webbing over load and attach hooks to solid anchor point or pull strap around anchor and hook into "D" ring.
2. Insert webbing through ratchet and pull until ALL slack is out of webbing (Fig. 1).
3. Pump ratchet handle and wind 2 to 4 layers of webbing around reel to secure.
4. CAUTION: too many layers of webbing will jam ratchet. If too much webbing is piling on ratchet reel, start procedure over, first removing ALL slack from webbing over load.
5. After load is secured, move ratchet handle down flat for transit. (Fig. 2)
6. To release, compress release bar and open handle 180 degrees. (Fig. 3)
